CS graduate with experience across the full stack — AI/ML backends, RAG pipelines, vector search, and REST APIs — with a focus on measurable results.

EDUCATION

Indian Institute of Information Technology (IIIT) Kottayam, Kerala, India

Nov 2022 – May 2026

B.Tech – Computer Science and Engineering

Relevant Coursework: Data Structures & Algorithms, Machine Learning, Artificial Intelligence, Deep Learning, Databases, Operating Systems, Cloud Computing

PROJECTS

Neural OPS – Enterprise AI Hiring & Candidate Intelligence Platform

GitHub

FastAPI, Python, PostgreSQL, Redis, Qdrant, Gemini, Celery, MLflow, Docker, Next.js · May 2026

- Built a candidate ranking pipeline using Qdrant vector search, skill scoring, and experience signals; processed ingestion and embedding asynchronously using Celery and tracked experiments with MLflow.
- Benchmarked candidate matching across **241 runs** under concurrent workloads, achieving median latency of **28.31 ms**.
- Used Redis to control concurrent requests and enforce per-tenant LLM usage limits; collected latency metrics for performance analysis.

Simplify – Citation-Enabled RAG Platform

GitHub | Live

Next.js, TypeScript, FastAPI, Python, MongoDB Atlas, Pinecone, Supabase, Gemini · April 2026

- Built an async document ingestion pipeline for validation, extraction, chunking, embedding generation, and Pinecone indexing; benchmarked **542 runs** with median latency **24.20 ms** and p95 below **353 ms**.
- Added citation-enabled responses with Gemini streaming and secured APIs using JWT auth, refresh-token rotation, denylisting, and email OTP rate limiting; deployed frontend on Vercel and backend on Render with metadata in MongoDB Atlas and files in Supabase Storage.

TaskFlow – High-Performance Task Management API

GitHub

Java 17, Spring Boot 3, Spring Security, JWT, PostgreSQL, Docker, GitHub Actions · 2025

- Built JWT-secured REST APIs with RBAC and dynamic filtering across status, priority, assignee, and keyword fields; achieved **p95 latency below 50 ms**.
- Added immutable audit logging to track field-level changes with actor and timestamp; containerized using multi-stage Docker builds and automated testing and deployment with GitHub Actions, JUnit 5, and Mockito.

TECHNICAL SKILLS

Languages	Java, Python, C/C++, JavaScript, TypeScript, SQL (PostgreSQL, MySQL), R
Web	Next.js, React, Node.js, Express.js, FastAPI, Flask, Spring Boot
AI / ML	LangChain, Pandas, NumPy, Scikit-learn, RAG, Vector Search
MLOps & Tools	MLflow, Celery, Docker, GitHub Actions
Databases	PostgreSQL, MongoDB Atlas, Redis, Pinecone, Qdrant, Supabase, FAISS, ChromaDB
Cloud & Deployment	GCP, Gemini (Chat + Embeddings), Vercel, Render

CERTIFICATIONS

Supervised Machine Learning: Regression & Classification – DeepLearning.AI / Stanford

Coursera

Machine Learning in Production – DeepLearning.AI

Coursera

Generative AI and LLMs: Architecture and Data Preparation – IBM

Coursera

ACHIEVEMENTS & LEADERSHIP

Qualified GATE 2026 – Graduate Aptitude Test in Engineering (DA paper)

2026

Organiser – Adavya Freshers Fest 2024 | Outreach – Sponsorship

2024
